PROJECTS

LinkedIn Clone

Simplified version of LinkedIn. Main features are authentication and post creation with images or videos attached to it

Technologies used: React, React Router, Styled-Components, Firebase, Redux
- Redux is used to manage global state of application
- Firebase is used as a database and to implement authentication
- React-Router helps navigate between login and feed pages

Realtor

Real Estate listings application with ability to filter properties

Technologies used: Next.JS, REST API, Chakra UI
- Chakra UI was used for fast creation of user interface
- All of the properties are taken from Bayut API
- Next.JS is used for navigation between the pages and for SSR and SSG

GraphCMS Blog

Blog with ability to easily manage content and add comments

Technologies used: Next.JS, GraphQL, GraphCMS, Tailwind CSS
- Tailwind CSS is used for fast creation of user interface
- GraphQL is used to make queries and get all the necessary data, GraphCMS
- Next.JS is used for navigation between the pages and for SSR and SSG
